CAREER OBJECTIVES

Motivated graduating student with a current GWA of 1.18, seeking a position in an organization as a software engineer. Proficient in programming, eager to contribute to the company's agenda and drive innovation. Ready to be part of a visionary team to achieve remarkable advancements in software development.

EDUCATION

West Visayas State University

Bachelor of Science in Computer Science

Major in Artificial Intelligence

La Paz, Iloilo City

2020 - Present

Filamer Christian University

Science, Technology, Engineering, and Mathematics

With Honors

Roxas Avenue, Roxas City

May 2020

WORK EXPERIENCE

Software Developer (Part-time)

Present

Jan 2024 -

Forever Passion Dream Inc. (New York, United States)

- Working as a software developer specializing in **developing web applications** that **leverage artificial intelligence** to address the specific requirements of businesses.

Software Developer Intern

Spring Valley Tech Corp. (Bago City, Philippines)

Jan 2024 - Present

- Engaged in an immersive **software development training** program while also gaining experience in **cloud-based development, specifically, AWS**.

PROJECT EXPERIENCE

SafetyPin <https://safetypin.onrender.com/>

2023

- Led a team that developed an **algorithm-centric web application** that recommends safety routes, and provides heat map visualization of crime patterns to enhance citizen safety.
- Tech Stack: ReactJS, FastAPI, PostgreSQL, Render, JavaScript, Bootstrap, CSS, HTML.

ContentSite <https://explore-content-site.vercel.app/>

2023

- Developed a **full-stack web application** that enables users in **generating and disseminating content** organized through the utilization of hashtags (#), offering precise categorization and enhanced accessibility.
- Tech Stack: Next.js, MongoDB, Node.js, Express.js, Javascript, TailwindCSS CSS, HTML.

Iloilo Coffee House <https://iloilo-coffee-house.onrender.com/>

2023

- Developed a **full-stack product rating and review** web application for Iloilo Coffee House using **MERN stack**.

- Tech Stack: React.JS, Node.JS, MongoDB, Render, JavaScript, Bootstrap, CSS, HTML.

Swiftify <https://swiftify-spotifytswrap.onrender.com/> 2023

- Leveraged the **Spotify API** to dynamically showcase users' most-listened-to Taylor Swift tracks.
- Tech Stack: Flask, Render, JavaScript, Bootstrap, CSS, HTML.

GENPIXEL <https://gan-comvis.onrender.com/> 2022

- Developed a web application utilizing a trained **Generative Adversarial Network (GAN)** AI model to generate new face images from a dataset of 10,000 instances.
- Tech Stack: Flask, Render, JavaScript, Bootstrap, CSS, HTML

PneumoScan <https://pneumoscanai.onrender.com/> 2022

- Developed an **AI-driven web application** that enables users to upload chest X-rays for analysis, providing insights into the likelihood of pneumonia based on **CNN modeling** with a **90% accuracy**.
- Tech Stack: React.JS, FastAPI, JavaScript, Bootstrap, CSS, HTML.

AWARDS

One of the Top 10 Innovations – BPI – DOST Innovation Awards 2023 2023

- **Represented our institution and led a team** in a **national competition** presenting our thesis, SafetyPin, at the **BPI-DOST Innovation Awards 2023**, showcasing our collaborative efforts in developing impactful solutions.

Academic Awards 2020 - 2023

- Received the **Gold Medal for Academic Excellence** from WVSU – CICT Department for three consecutive years, acknowledging sustained outstanding performance.

Leadership Awards 2018- 2020

- Recipient of the Congressman Emmanuel Billones Award of Excellence, Leadership Award, and two service awards in 2020.
- Recipient of Leadership Award, and two service awards in 2019.

SKILLS & INTERESTS

Skills

- **Frontend** - Next.JS, TypeScript, React.JS, JavaScript, Tailwind, Bootstrap, CSS, HTML.
- **Backend** - Node.JS, Express.JS, FastAPI, Flask, PostgreSQL, MongoDB, MySQL.
- **Programming Languages:** JavaScript, Java, PHP, Python, C++.

Interests

- Software Development, Programming, Artificial Intelligence, Machine Learning, Algorithms.
